

## Why choose Joomla! for your website?

*Joomla! is chosen by many leading organisations as the basis for their website because of its global support, open source licensing, flexibility and ease of use.*

You'll be in great company with names like eBay, Harvard University, The Guggenheim Museum, MTV, United Nations, Heathrow Airport, Leonardo diCaprio, Peugeot, Mexico City, the Eiffel Tower, Maersk, Orange Telecom, Ikea, Sony Pictures, Pizza Hut, Tesco and many others.

## What is the cost?

Joomla! is Open Source which means there is no cost for using Joomla!

You pay only to customise and extend the core functionality. There are no ongoing licence fees as with closed-source software.

## Joomla! is flexible

Joomla! can be used for a simple website to an enterprise ready, multi-lingual e-commerce solution. Additional functionality can be added quickly and without making major changes to the site.

## Joomla! is extensible

The core of Joomla! are its extensions which are used to add functionality from image galleries to e-commerce sites to social networking. There are over 6500 extensions available for almost every purpose imaginable. If you can't find one to suit your needs, we can custom code an extension to suit your unique requirements.

## Joomla! is user friendly

Joomla! is easy to understand for users and easy to administer for you and your team. If you can use a word processor, you can add and edit articles in Joomla!.

There is no steep learning curve and no specialist training required – your staff can leverage their existing skill-sets without detracting from your business.

## Mobile ready

Joomla! is fully mobile responsive and Joomla! sites look great on phones, tablets and Blackberries.

## Global support

You'll never be alone with your Joomla! website.

Joomla! is strongly supported by a global base of developers, designers and consultants. There are thousands of Joomla! developers, designers, consultants and coders world-wide who can customise your site with whatever functionality you want.

The Joomla! forum is also active 24/7 with over 600,000 members and over 2,700,000 posts about all aspects of Joomla!

## Why use Wintercorn?

We specialise in Joomla! and have done since 2006.

We know it inside out and offer a comprehensive range of Joomla! consulting services including design, hosting, upgrades, custom coding, training, business consultancy and secure managed hosting.

## What next?

Talk to us about your Joomla! project and we'll prepare a detailed proposal including time-frames, training and ongoing support.
